Re: WC Docket No. 02-384, *Application by Verizon Maryland Inc., Verizon Washington D.C. Inc., Verizon West Virginia Inc., Bell Atlantic Communications, Inc. (d/b/a Verizon Long Distance), NYNEX Long Distance Company (d/b/a Verizon Enterprise Solutions), Verizon Global Networks Inc., and Verizon Select Services, Inc., for Authorization to Provide In-Region, InterLATA Services in Maryland, Washington, D.C., and West Virginia*

Dear Ms. Dortch:

The purpose of this ex parte letter is to provide clarification and additional information for two issues raised by FiberNet, LLC ("FiberNet") in its January 9, 2003 comments in the above-captioned proceeding. Specifically, the information being provided relates to the discussions regarding "M-Loop and Facility Reuse" found on pages 19-23 of FiberNet's January 9, 2003 comments as well as the discussion relating to Verizon West Virginia Inc.'s refusal to provide "dialing parity" found on pages 55-60 of FiberNet's comments.

With respect to the issue of M-Loops, FiberNet has appended hereto as Attachment 1 a network diagram that illustrates how the M-Loop is designed to function. Specifically, the M-Loop is to function much like an Enhanced Extended Loop or EEL. Under the M-Loop scenario, FiberNet would order a DS-1 facility from Verizon West Virginia. FiberNet would then break down each of the 24 channels associated with this DS-1 to a DS-0 level for use as individual loops to serve end user customers. FiberNet is using this M-Loop product to transfer existing resale customers to on-net facilities.

On the dialing parity issue, FiberNet has included several informational items as requested by the Wireline Competition Bureau staff that demonstrates that FiberNet's on-net customers in certain recognized EAS areas in West Virginia are not able to utilize the same dialing parity arrangements as those enjoyed by similarly situated Verizon West Virginia end users. Appended hereto as Attachment 2 are sections taken from Verizon West Virginia's current Local Exchange Services Tariff, P.S.C.-W.Va.-No. 202, showing the exchanges and local calling areas for its end users in Huntington, Parkersburg,

ORIGINAL

Weirton and Wheeling, West Virginia, respectively. As can be seen from Verizon West Virginia's tariff, Verizon West Virginia's end users have as part of their recognized local calling areas corresponding exchanges located in the State of Ohio.

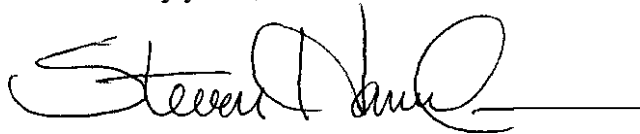

In addition, appended hereto as Attachment 3, FiberNet has included information taken from the appropriate Verizon West Virginia telephone directories for Huntington, Parkersburg, Weirton and Wheeling, West Virginia, which again shows the scope of the recognized local calling areas for Verizon West Virginia's end user customers. Again, as was the case with the above-referenced tariff pages, Verizon West Virginia's recognized local calling areas in these communities in West Virginia extend to corresponding EAS wire centers located in the State of Ohio.

FiberNet has also appended hereto as Attachment 4 a series of three network diagrams showing 1) the network situation as it existed in Huntington, West Virginia from 2000-2001; 2) the network situation in Huntington, West Virginia following the implementation of the Verizon West Virginia "work around"; and 3) the network situation or "desired fix" that FiberNet believes should have been used by Verizon West Virginia all along in properly addressing these interstate EAS situations between West Virginia and Ohio.

Lastly, FiberNet has appended hereto as Attachment 5 a document outlining the additional expense that FiberNet has been forced to incur as a direct result of Verizon West Virginia's decision to block FiberNet's on-net end users in Huntington, Parkersburg, Weirton and Wheeling, West Virginia from being able to place local calls to the corresponding EAS areas located in the State of Ohio. As can be seen from this particular attachment, FiberNet has spent approximately \$364,000 to date in combating Verizon West Virginia's discriminatory and anti-competitive practice.

Please feel free to contact me directly if the Staff has any other questions of FiberNet regarding either of these two issues. The 20-page limit does not apply to this filing.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Steven Hamula", followed by a horizontal line.

STEVEN HAMULA  
Director of Regulatory Affairs  
FiberNet, LLC

**ATTACHMENT 1**

**M-LOOP DIAGRAM**

M-Loop is a term used to describe a UNE loop connected to a leased I/O multiplexer located in a Verizon wire center where a CLEC is not collocated. The multiplexer and the connecting Hi-Cap facility are leased from Verizon to connect a DS1 from a collocation in one Verizon wire center to the leased multiplexer located in another Verizon wire center where the CLEC is not collocated. The 2W VG POTS loop is leased and connected to the leased multiplexer in the non-collocated wire center to the customer demarcation point.
